Summary

Passionate and results-driven AI/ML student and Blockchain Developer with a strong foundation in full-stack development, specializing in building robust, scalable applications. Adept at leveraging modern technologies like Supabase and TypeScript to bring innovative projects from concept to production, as demonstrated by leading the development of a comprehensive e-commerce platform and prototyping advanced AI-blockchain protocols. Eager to explore new technological frontiers and contribute to cutting-edge development.

Skills

Programming Languages: TypeScript, JavaScript, Python, Makefile **Frontend:** React (implied by modern e-commerce), UI/UX Principles **Backend:** Node.js (implied), Supabase, RESTful APIs **Blockchain:** Distributed Systems, Proof-of-Work (PoW), Smart Contracts (conceptual), Merkle Trees **AI/ML:** AI-powered Applications, Model Context Protocols **Tools & Platforms:** Git, GitHub Actions, Vercel, Supabase CLI, VS Code **Methodologies:** Full-Stack Development, E-commerce Development, Project Phasing & Management, Code Organization, Deployment Preparation

Projects

FreshTerra E-commerce Platform *Led the end-to-end development of a full-stack e-commerce storefront, backend, and administrative dashboard, achieving production readiness. * Developed initial storefront (Phase 1), established a Supabase-exclusive backend (Phase 2), and implemented a comprehensive admin dashboard (Phase 3). * Engineered critical admin functionalities including product editing, deletion, order fallback, and organized components for maintainability. * Managed project phasing, deployment preparation (Vercel integration), and ensured seamless data management with Supabase. * **Technologies:** Supabase, Vercel, Full-Stack Development (Frontend/Backend), API Integration

Agent-s: The Model Context Protocol (MCP) *Designed and prototyped an open and extensible protocol to connect AI-powered applications with diverse data sources, APIs, and

blockchain-based smart contracts.* * Explored the integration of AI models with real-world data and blockchain ecosystems. * **Technologies:** AI, Blockchain, API Integration, Protocol Design

merkleNode *Developed and maintained a Merkle tree implementation project with UI components and CI/CD pipelines.* * Refactored codebase, implemented UI primitives, configured navigation, and ensured continuous integration via GitHub Actions. *

Technologies: TypeScript, GitHub Actions, UI/UX, Merkle Trees

Blockchain & Cryptocurrency Prototypes *A collection of projects demonstrating core blockchain concepts, including a simple blockchain, cryptocurrency system, and Proof-of-Work (PoW) simulators.* * Implemented fundamental blockchain mechanics such as block mining, cryptographic hashing, and transaction processing. * Explored multithreaded block mining and distributed consensus mechanisms. * **Technologies:** Makefile, Blockchain, Cryptography, Distributed Systems, PoW

Experience

Full-Stack Developer | Project Lead - FreshTerra E-commerce Project *Self-directed | [Current Month], [Current Year] – Present (based on Monthly Summary)* * Orchestrated the rapid development of a full-stack e-commerce platform, taking it from concept to production readiness. * Successfully delivered Phase 1 storefront, Phase 2 Supabase-aligned backend, and Phase 3 admin dashboard with robust features. * Demonstrated expertise in Supabase integration, project phasing, code organization, and preparing applications for live deployment.

Education

[University/Institution Name] – [Degree/Program], [Major] [City, State] | [Graduation Year]
